Report of first search of Billings Hospital records

Cases Chi-I and Chi-II were identified as unit Nos. 354370 and 371183, respectively. Celloidin blocks were available from Chi-II and wet specimens from Chi-I. Death certificates were not included in records.

Chi-III

Autopsy and biopsy records were searched for Hodgkin's disease (as per recollection of E.R. Russell) yielding the following unit #'s

385271	357210	357543
81913	371484	
77706	366351	
361161	348546	
335509	347623	
365177	210156	

None were suitable - females or inappropriate stay in Hospital.
