To whom it may concern;

Your plan on the clean plant clean up seems fine in and of itself. My problems lie mainly in that it doesn't address the difficult clean up problems nor does there seem to be a over all view of what the final outcome for the whole site will be

For example the tank farm and the soil under it are considered in this EIS. This will be a daunting and expensive clean up project. Will there be money for this project? Where + when does it fit into the final outcome - a clean ZWEGEL

Thank you for your efforts

D.H.
