## RECORD OF MEETING

---

**Project Name:** INEL RI/FS

**Project Number:** 301679.01

**Date and Time:** 1-25-94/2:00

**Call From:** Darren Meadows

**Call To:** Glenn Briscoe

**Subject:** SL-1 Burial Ground

---

**Summary of Discussion:**

Added curie content from something and roughly matched.

Content of what was missing  $\pm 20\%$  from the reactor.

No pictures of burial ground remembered.

No temporary burial ground remembered.

Gross gamma readings, estimated self shielding for point source  $\pm 20\%$ , Rem = 7 CE @ 1 ft where c = curies and E = energy level

Jay Kunz may remember some things - he is at University of Missouri

Log books may exist, may not.

Doesn't know what happened to waste after it went to hot shops.

Glenn wrote part of final report - HP Section.

Doesn't remember any waste being stored or any transfer of waste from a temporary pit.

Was at SL-1 facility every day from May 61 - June 62. He was with GE at the time.

No recollection of photographs or records.

No involvement with BORAX.

Approx. 3 ft of cover placed on top of waste
