RECORD OF MEETING

Project Name: BORAX-I/SL-1 FS
Date and Time: 12-2-94

Project Number: 301679.10

Call From: Douglas W. Vetter

Call To: Craig Kvamme, LITCO, 208-526-8667

Subject: Basis for RWMC Disposal Costs

Summary of Discussion:

I spoke with Craig in regards to the basis for the disposal costs he had provided to me previously (see telecon with Craig Kvamme, 3/23/94). The discussion was based on EPA Comments #15 and #22 on the FS.

Craig said the unit costs include all operating costs incurred at the RWMC. These are receipt inspection, radiation surveys, record inventory maintenance, personnel training and certification, disposal planning, waste generator interfacing, transport within the RWMC, and actual disposal.

Craig also said that approximately 45,000 ft³ of waste per year crosses U.S. 20/26 in route to the RWMC.
