

INTEROFFICE MEMORANDUM

Date: January 27, 2004

To: B. T. Richards MS 3921 6-5060

From: J. R. Arrowood *ja* MS 5209 6-4497

Subject: DOSE ESTIMATES FOR INTEC-603 BASIN ACTIVITIES

Please keep in mind that these dose estimates provide at best only generalized information. To calculate a more accurate estimate additional detailed descriptions of each separate task with specific work locations, equipment used and processes employed will need to be established. Dose estimates were derived from the manhours provided multiplied by the exposure rate expected to be encountered. The exposure rate was derived from previous routine surveys and knowledge of dose received during previous work within this area.

OPTION 1

	Manhours	Assumptions	Exposure Rate	Dose Estimate
Sludge Removal	5370	Basins will be filled with water. Workers will be within the basin areas. Equipment will have shielding.	5 mR/hr	26.8 rem
Basin Containment	4561	Containment will be constructed over filled basins. Workers will be within basin areas.	5mR/hr	22.8 rem
Basin Decontamination	3688	Some work will be done with water in the basin, However, workers will be in close proximity of basin surfaces	10 mR/hr	36.8 rem
Water Removal	500	Most work will be done outside of basin area. Work will be around contaminated components.	1mR/hr	500 mrem
				Total 86.9 rem

OPTION 2

Sludge Removal	5370	Basins will be filled with water. Workers will be within the basin areas. Equipment will have shielding.	5 mR/hr	26.8 rem
Grouting	1584	Work will take place in basin areas.	5 mR/hr	12.5 rem
				Total 39.3 rem

OPTION 3

Grouting	1584	Work will take place in basin areas.	5 mR/hr	12.5 rem
				Total 12.5 rem

OPTION 4

Water Removal	500	Most work will be done outside of basin areas. Work will be around contaminated componets.	1mR/hr	500 mrem
Grouting	1584	Work will take place in basin areas	5 mR/hr	12.5 rem
				Total 13 rem

If there are any questions, please call me at 6-4497.
