

1. Hospital -Ownership - Operating responsibility
2. Contractual relationship
 - a. With MED
 - b. With AEC
3. Relationship between MED staff and patients
4. Relationship between AEC staff and patients
5. Relationship between MED staff and other staff
6. Relationship between AEC staff and other staff
7. Basis for determination to give injections
 - a. Level of approval
8. Was this treatment or research
9. Was there a central plan or did R, CH and SAN act independently
10. Process for selection of patient for injection
 - a. Reason for hospitalization
 - b. Did patient have a private physician
 - c. Was physician consulted
 - d. Was physician on MED-AEC payroll
 - e. Was approval given by patient, family or guardian
11. Who gave order to make injection
12. Who gave injection and how was it done
13. Quantity injected and reason
14. Was injection recorded on patient's medical record
15. Type of record maintained and by whom
16. How long did patient remain in hospital
17. Was discharge delayed because of injection
18. How was contact maintained with patient after discharge
19. Who paid for visits made for test purposes
20. What reason was patient given for test
21. Was there any change in staff when AEC took over from MED
22. Basis on which AEC continued the study
23. Was consideration given to making disclosure to patient
24. Why did AEC decide to terminate study
25. What reason was given to patients for termination
26. Why did AEC restart the study

0000098

27. What reason was given to patient for restart
28. Meetings within the AEC to evaluate problem
29. Who accumulated data on project
30. To whom was it made available
31. Use made of this data
32. Benefits derived from data
