

Telephone call from Dr. Brooks April 8, 1974 11:30 a.m.

Everything is going real well. Have talked with Dr. Sinclair and are now talking to Dr. Brues and the Assistant Director in charge of the records (Stehney) and also Michael Fry who is Chairman of the Human Use Committee. We are making an on the spot determination of records. From the Dr.-patient standpoint we may not be able to get copies immediately. It looks like we are going to be able essentially to duplicate the files. This all relates to the current records. We are going to have to explore another whole line to see if we can find any of the old records. We started but Dr. Sinclair wanted to see us before we did anything. They don't even know if the old records are here or somewhere else. It looks as if we will be able to get what we can get today on the current records.
