November 23, 1971

Dr. Patricia W. Durbin
Lawrence Radiation Laboratory
University of California
Berkeley, California 94720

Dear Pat:

You have an appointment for all afternoon December 7 with Dr. Christine Waterhouse. I have talked with her twice about your interests in finding out more about the HP cases. She is very interested and very willing to cooperate. Indeed, she told me yesterday that she thought she had located all but two of the cases and will have the records pulled by the time of your visit.

She also might have some time on December 8 but since our meeting is scheduled to be finished by lunch time on the 7th you, of course, have the afternoon available and I went ahead with that plan.

Somewhere along the line I have managed to misplace the handout you had at the Plutonium Registry meeting in Richland. If you could bring or send me another one, I would certainly appreciate it.

Looking forward to seeing you on December 6. On the assumption that you are coming, Rose Sternberg will make the Towne House reservation for Sunday, Monday and Tuesday nights, December 5, 6 and 7.

Best,

Sincerely,

Newell

J.N. Stannard
Professor of Radiation Biology
and Biophysics

/rs

P.S. Your letter of November 18 just arrived. I had already talked with Chris about December 7. Hence I am responding although you may hear from her directly also.

J.N.S.
