Prof. Robley D. Evans  
4621 East Crystal Lane  
Scottsdale, Arizona 85253

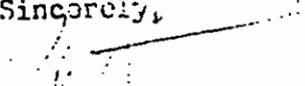

Dear Dr. Evans,

Enclosed is a copy of a letter to Bob Rowland concerning the sharing of specimens flowing from the follow-up of the people injected with Pu in the middle-forties. I had a solemn pact with Wright that Los Alamos would participate in exchange for their releasing responsibility for the follow-up. As I point out in the letter to Bob, this was not based on selfishness on their part, but on their desire to see a good and complete job done.

I hope you agree and will lend your considerable influence on the policies of the Center for Human Radiobiology to the end that some workable agreement is reached.

I expect our paths will cross at the IIRPA meeting; that is if LRL does not have to shore up any more sliding hillsides.

Sincerely,

  
Patricia W. Durbin
