

FAST FY 2018 Data Call: A Preliminary Review

Ron Stewart

March 2019

The INL is a U.S. Department of Energy National Laboratory
operated by Battelle Energy Alliance

FAST FY 2018 Data Call: A Preliminary Review

Ron Stewart

March 2019

**Idaho National Laboratory
Idaho Falls, Idaho 83415**

<http://www.inl.gov>

**Prepared for the
U.S. Department of Energy
Office of Energy Efficiency and Renewable Energy, Office of Nuclear Energy
Under DOE Idaho Operations Office
Contract DE-AC07-05ID14517, DE-AC07-05ID14517**

FAST FY 2018 Data Call: A Preliminary Review

INTERFUEL – March 2019

Ron Stewart
FAST Team Lead
Idaho National Laboratory

www.inl.gov

Topics

- **Status of FY 2018 fleet data submission**
- **Overview of the fleet**
- **This year's review process**

Status of FY 2018 Submission

- **All reporting agencies submitted vehicle-level data for FY 2018**
 - 40 of 50 reported VLD in FY 2017
- **48 reporting agencies**
 - 3 agencies finishing review & corrections
 - All other agencies' submissions considered final
- **Caveat: All data shown here is preliminary!**
 - Current as of 2019-03-06
 - **Will** change before considered final

New Review Process

- **With recent move to VLD, significant external interest in fleet data**
 - “How good is the data?”
- **New review process implemented this year**
 - Identify potential issues in agency submissions
 - Communicate those to reporting agency
 - Agency reviews and responds
 - Corrects, where feasible
 - Assemble and summarize review/response/corrections
- **FAST management team has basis for...**
 - Answering that “How good is it?” question
 - Tracking improvement in future years

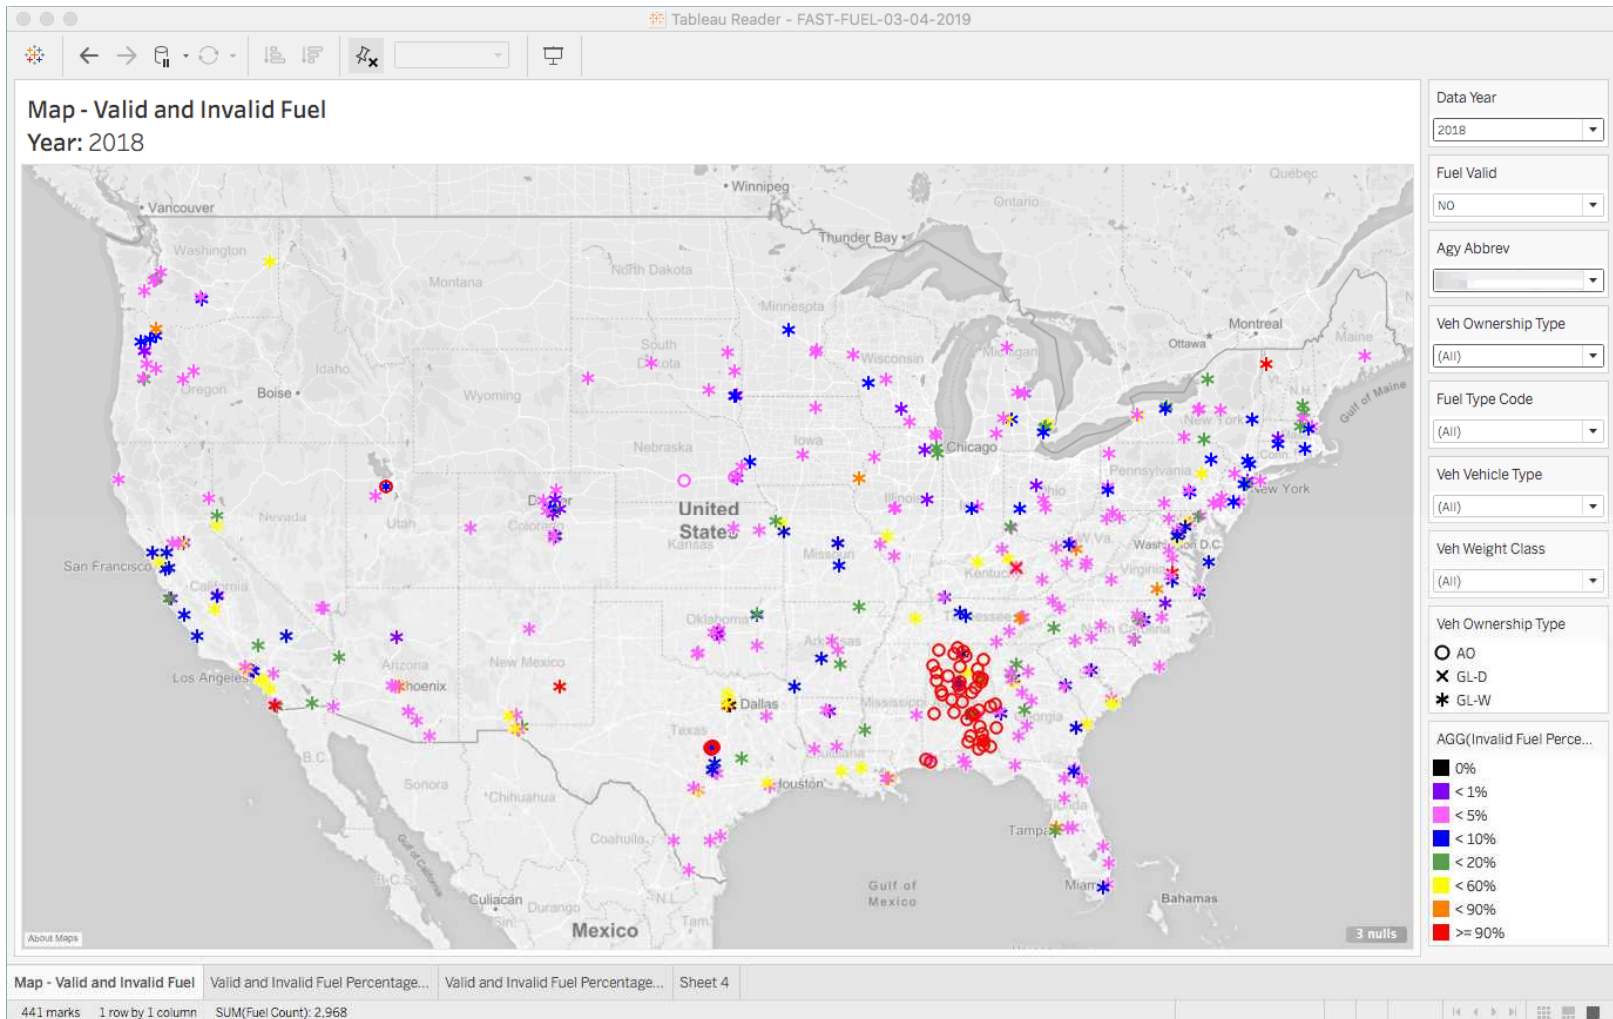

New Review Process: Dashboard

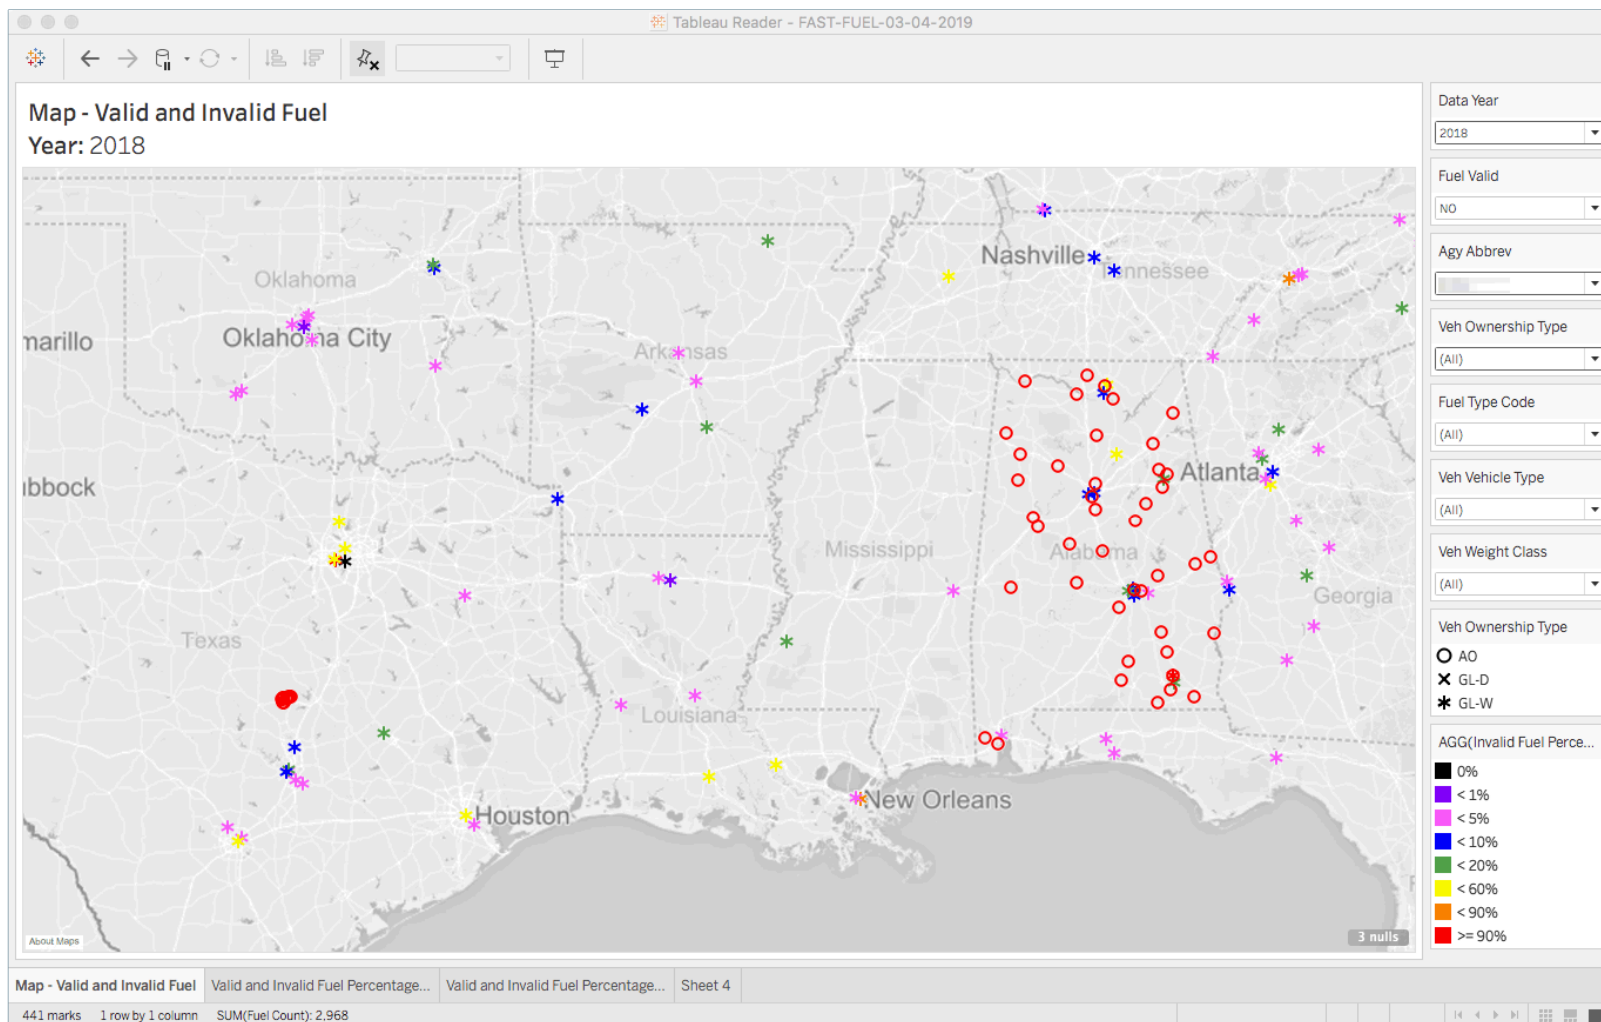

New Review Process: Areas of Concern

- **Incomplete response to review feedback**
- **Changing vehicle ID's from year to year**
 - Only half of non-USPS vehicles from prior year carry identical vehicle ID
- **Measure 6: # of vehicles with invalid high fuel efficiencies**
- **Measure 7: year-to-year consistency of reporting**
 - b) # of vehicles reported in current year but missing from prior year (40K)
 - d) # of vehicles reported in prior year inventory but missing from current year (28K)
 - e) # of vehicles with changes to “immutable” attributes (224K of 554K; 40.3%)
- **Measure 8: # of vehicles with placeholders for 1+ attributes**
 - ~20,400 vehicles with 28,500 placeholders
- **Vehicles with invalid fuel type consumption**
