

# Applying existing methods from other industries to decarbonize food processing

February 2022

*Changing the World's Energy Future*

Ruby Thuy Nguyen, Md Mamunur Rahman, Damon S Hartley, Michael H Severson, Yingqian Lin

*INL is a U.S. Department of Energy National Laboratory operated by Battelle Energy Alliance, LLC*

**February 2022**

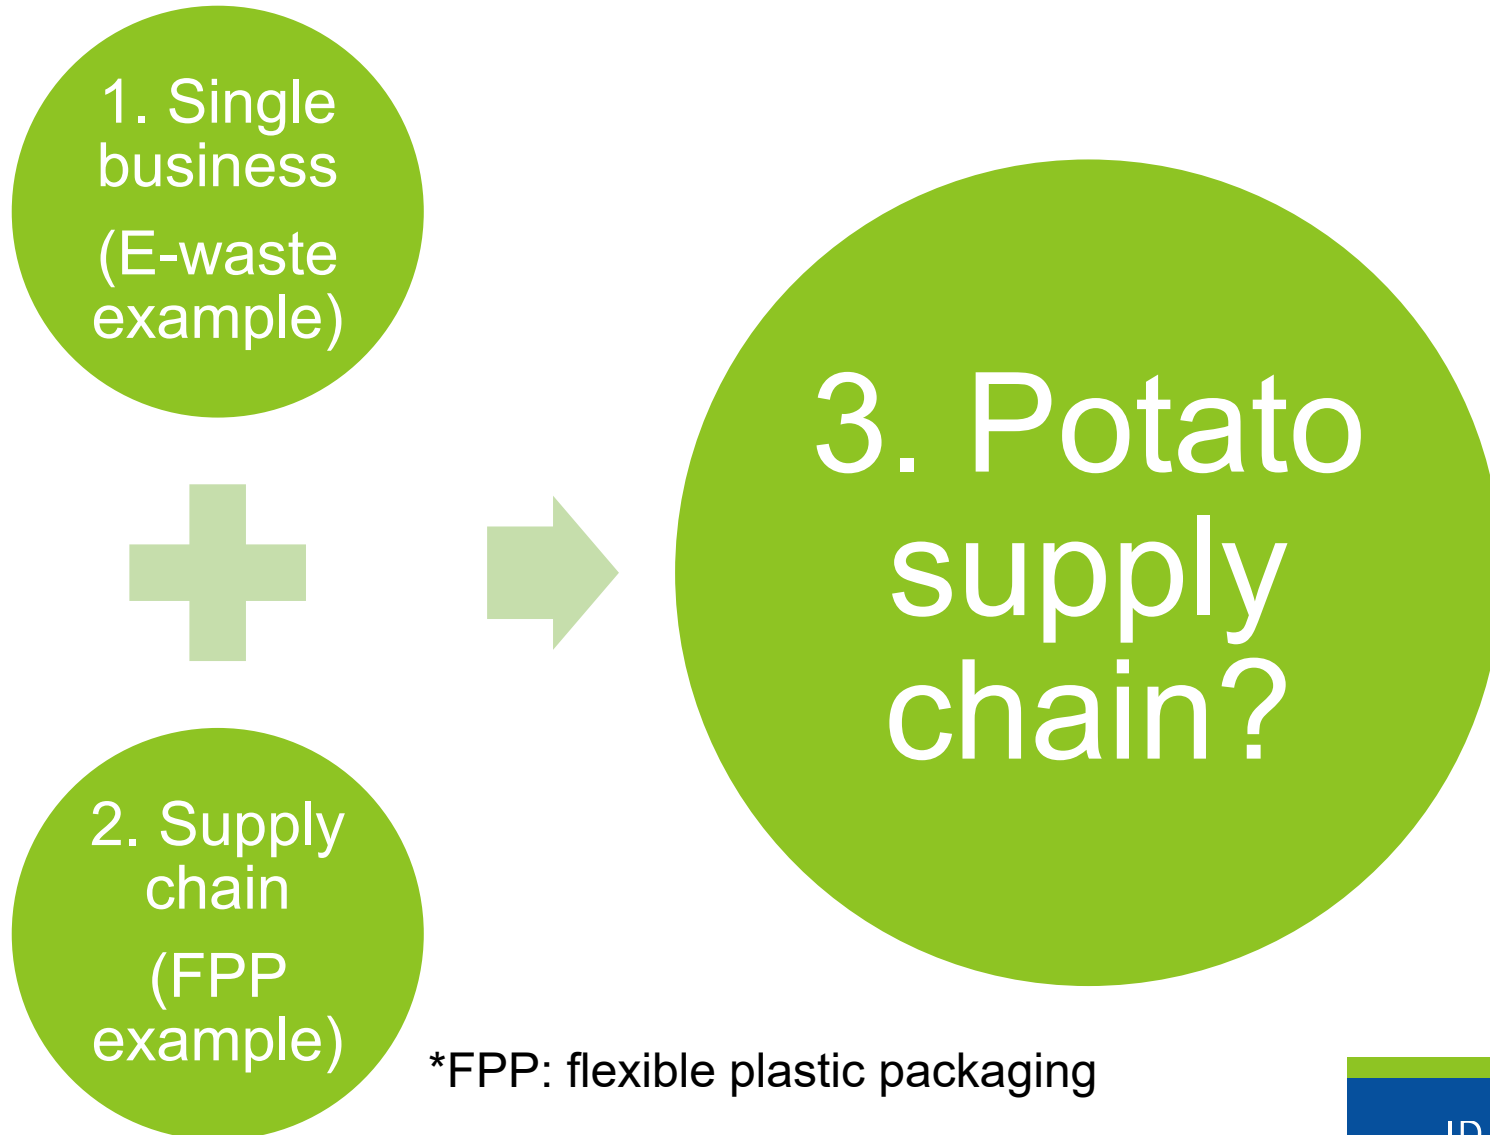

**Idaho National Laboratory  
Idaho Falls, Idaho 83415**

**<http://www.inl.gov>**

**Prepared for the  
U.S. Department of Energy  
Under DOE Idaho Operations Office  
Contract DE-AC07-05ID14517, DE-AC07-05ID14517**

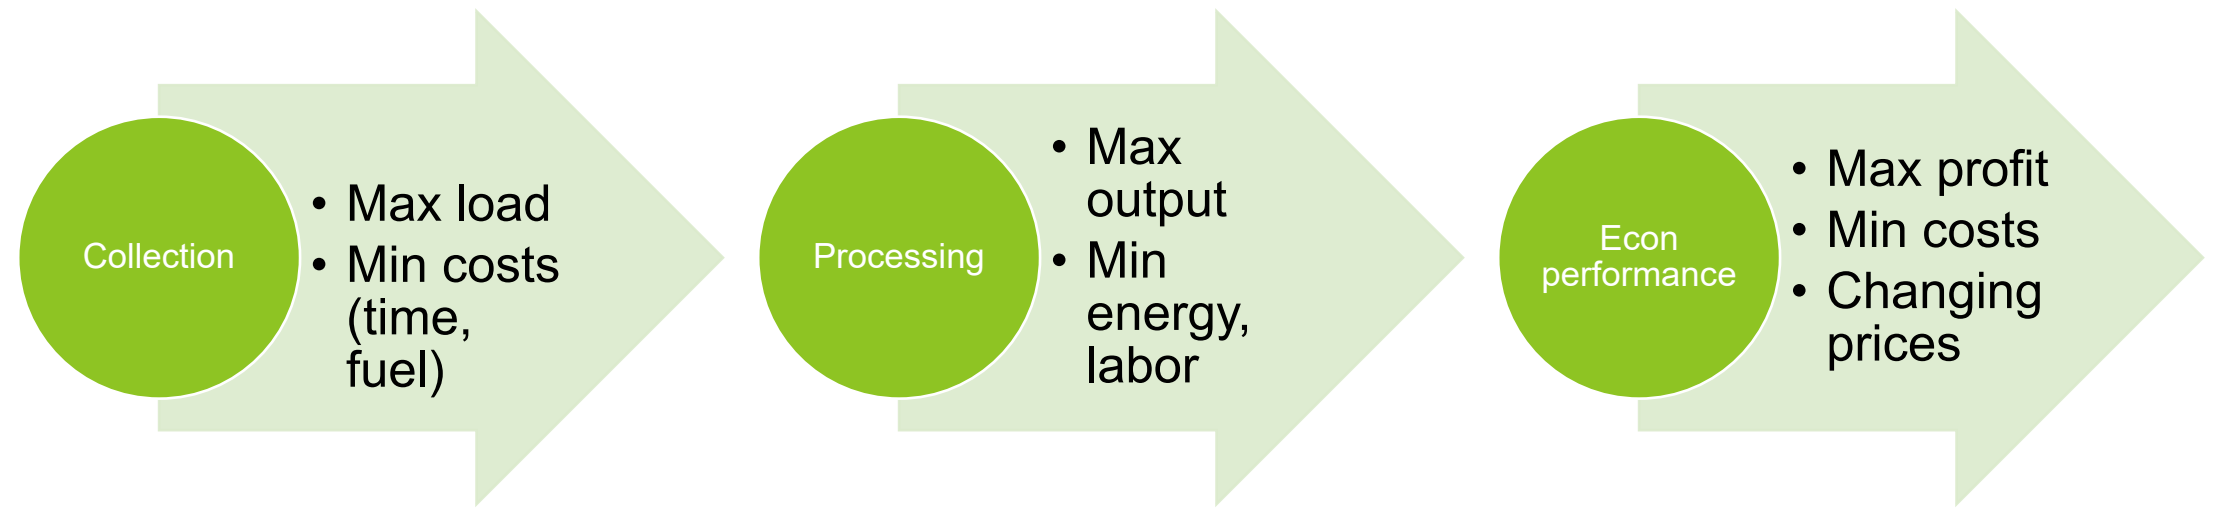

# **Applying existing methods from other industries to decarbonize food processing**

## Two levels of decarbonization

# 1. Decarbonizing a single business

## Manufacturing industry: e-waste example

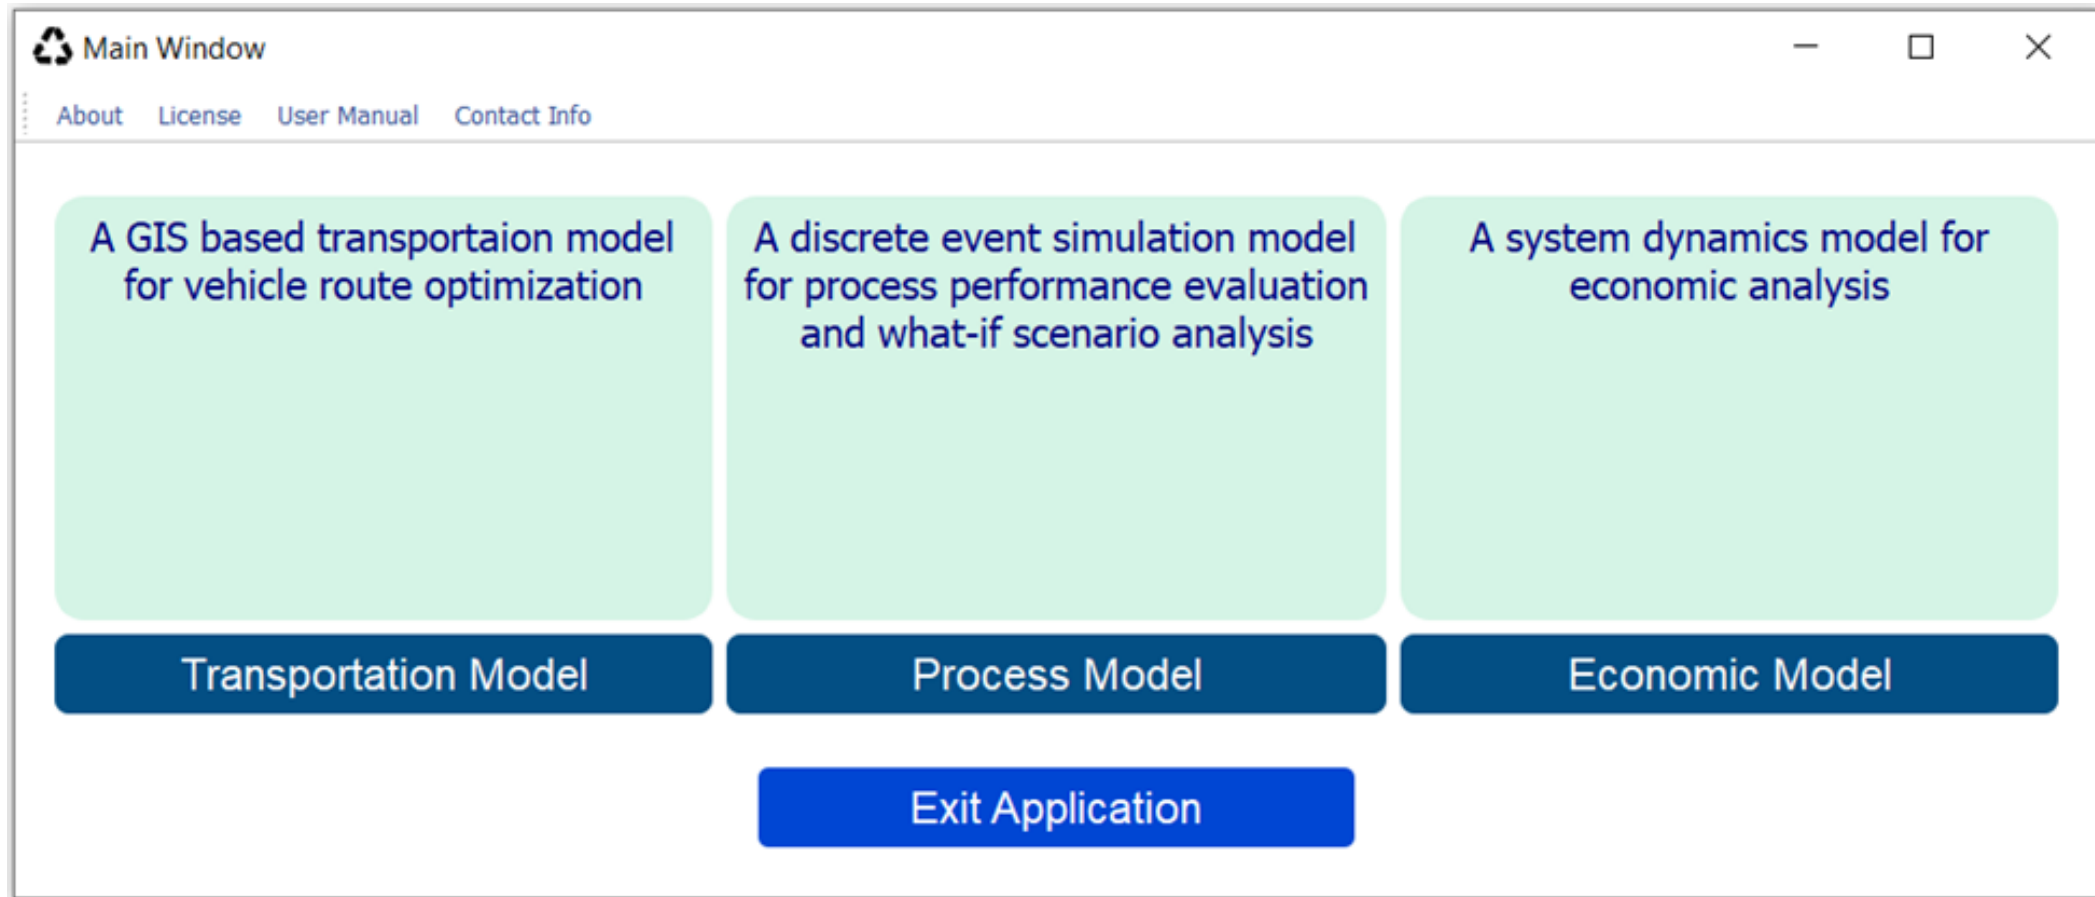

Funded by  **REMADE**<sup>®</sup>  
INSTITUTE

Partnered with  **SUNNKING**  
*We Rule Electronics Recycling*

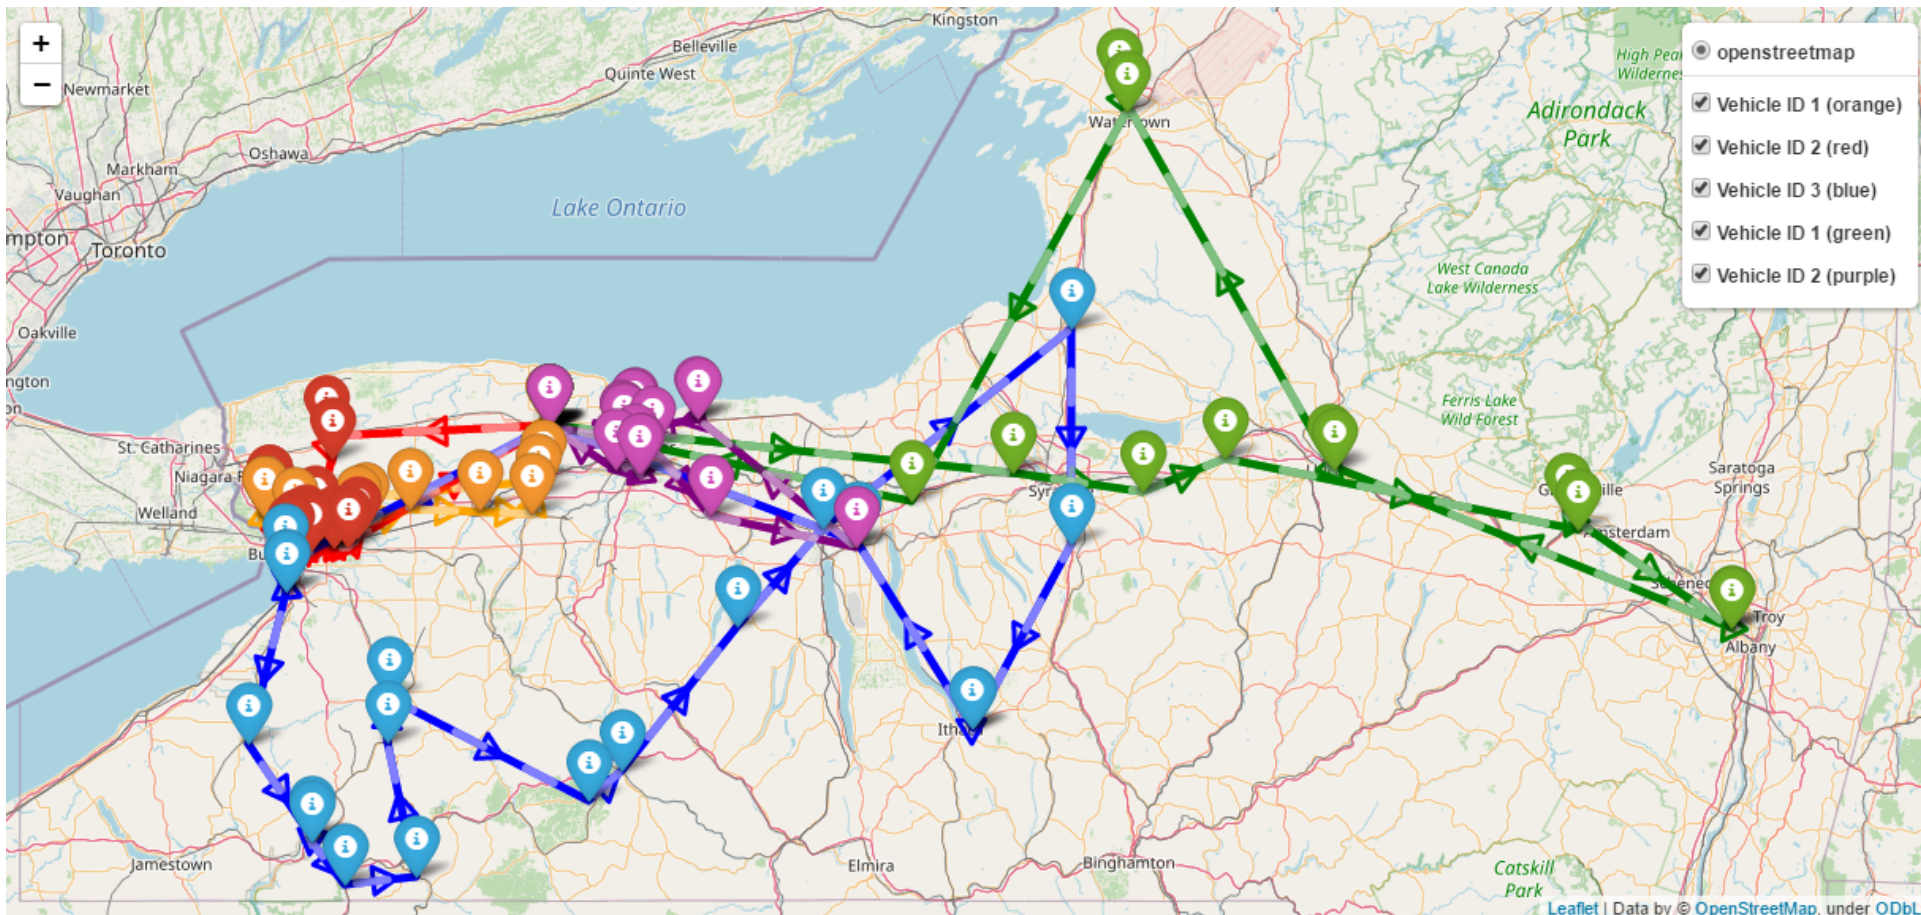

# 1. Decarbonizing a single business

Application interface, Python based

# 1. Decarbonizing a single business

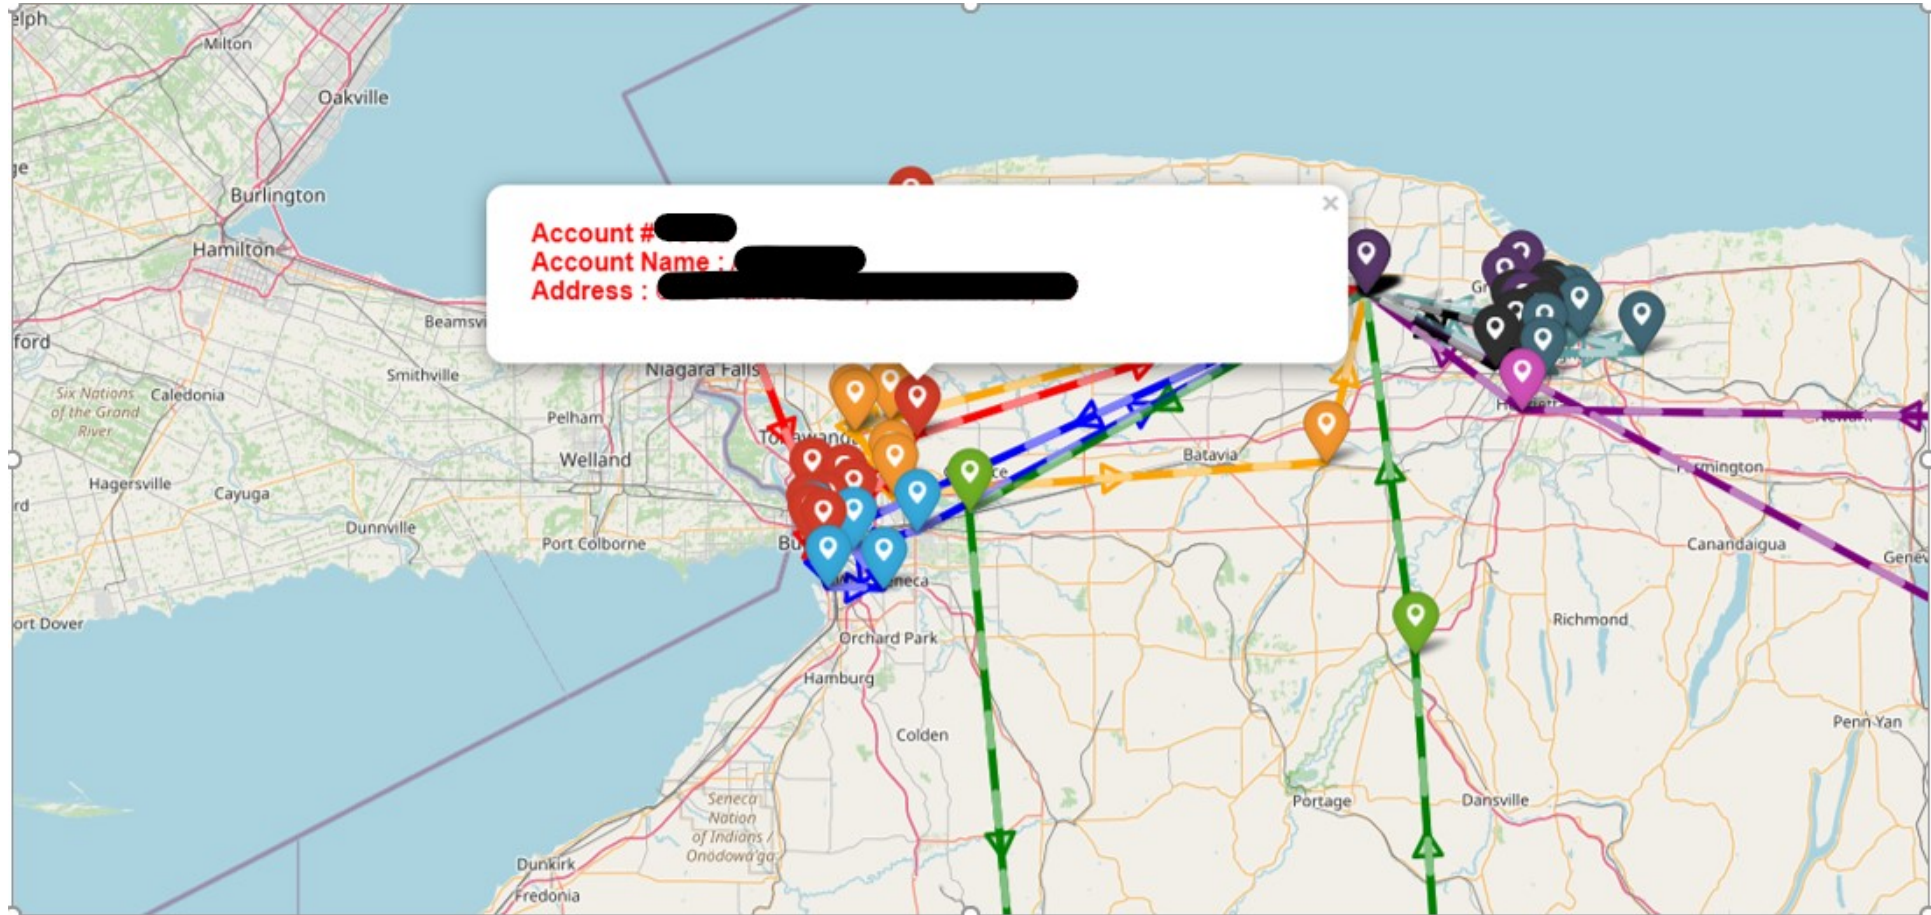

## 1.1 Transportation module: minimize time or distance

# 1. Decarbonizing a single business

## 1.1 Transportation module

# 1. Decarbonizing a single business

## 1.1 Transportation module

```
Transportation Model Output

vehicle_1
=====
Route: ['Company-XYZ',
Travel distance :
Travel time :
Fuel burnt :
CO2 emission :
Miles per gallon :
Collected amount :
Capacity utilization :

vehicle_2
=====
Route: ['Company-XYZ',
4', 'Account 20', 'Acco
Travel distance :
Travel time :
Fuel burnt :
CO2 emission :
Miles per gallon :
Collected amount :
Capacity utilization :

vehicle_3
=====
Route: ['Company-XYZ', 'Account 24', 'Account 19', 'Account 7', 'Account 8', 'Account 12', 'Account 10', 'Account 1', 'Account 2',
'Account 22', 'Company-XYZ']
Travel distance : 1,062.6 miles
Travel time : 22.9 hours
Fuel burnt : 130.2 gallons
CO2 emission : 2,878.7 lbs
Miles per gallon : 8.2
Collected amount : 35 pallets
Capacity utilization : 100%

Overall Summary
=====
Total collected amount : 103 pallets
Unvisited account names : None
Uncollected amount : 0 pallets

# 1. Decarbonizing a single business

## 1.2 Process module: modularized, adaptable

# 1. Decarbonizing a single business

## 1.2 Process module

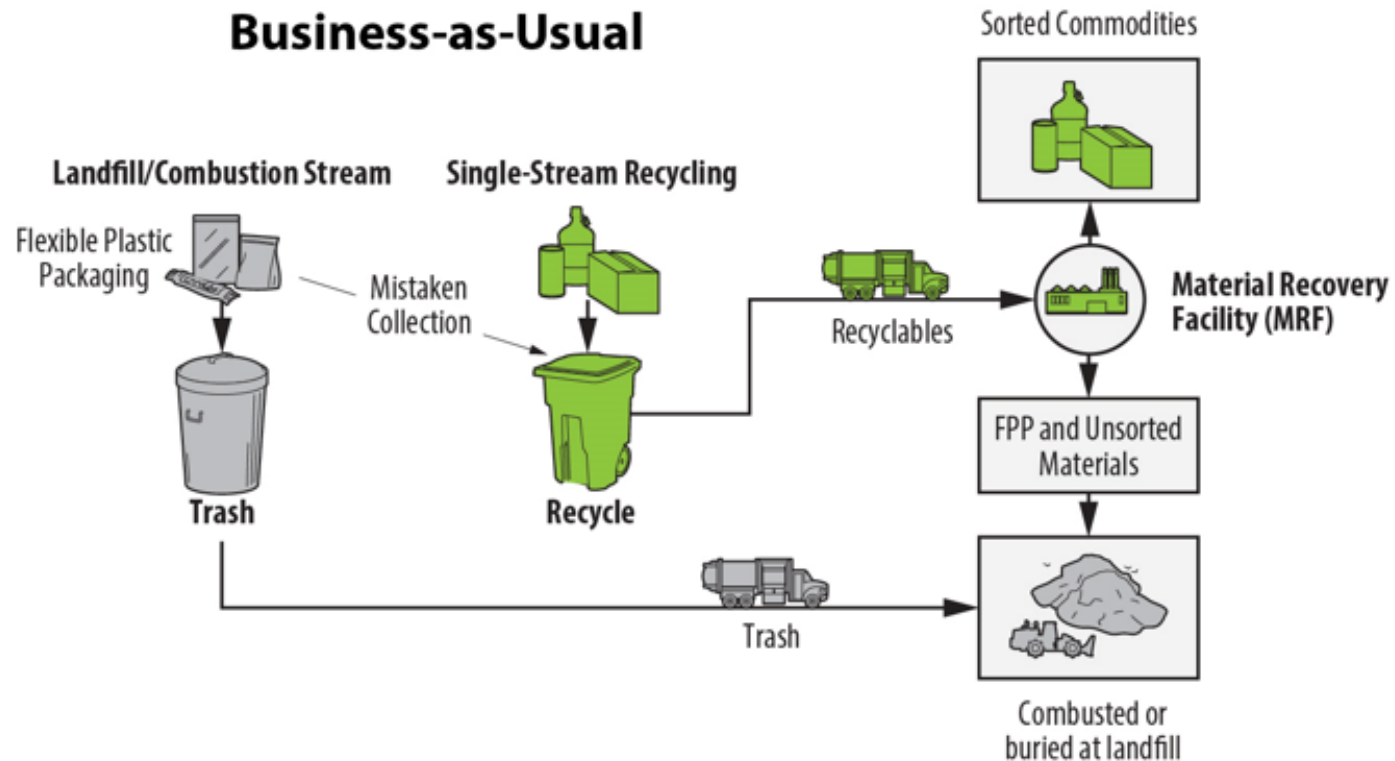

# 1. Decarbonizing a single business

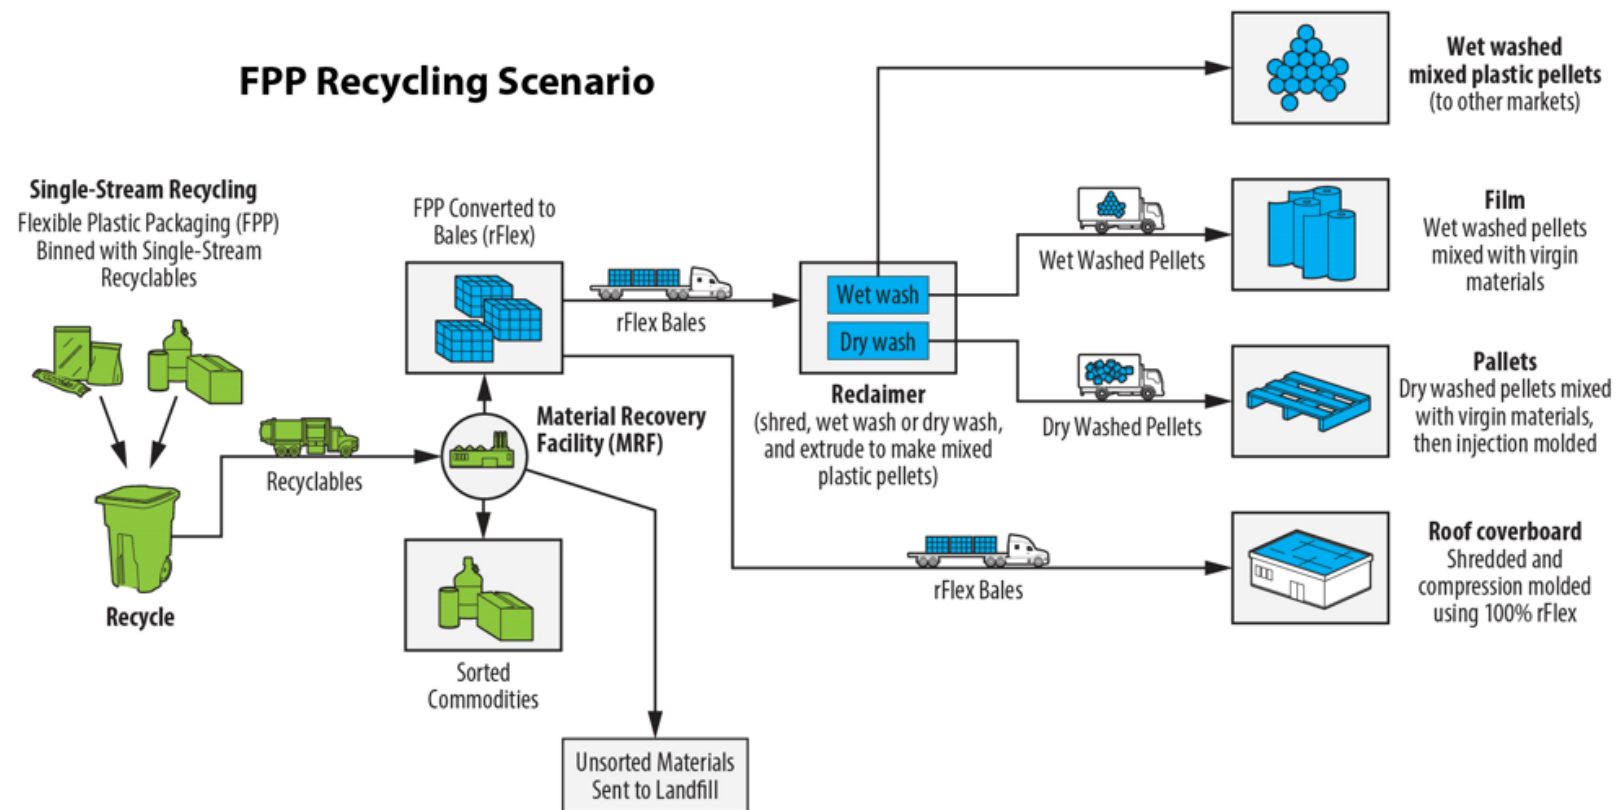

## 1.3 Economic module

## 2. Decarbonizing a supply chain

## 2. Decarbonizing a supply chain

Funded by

Research team

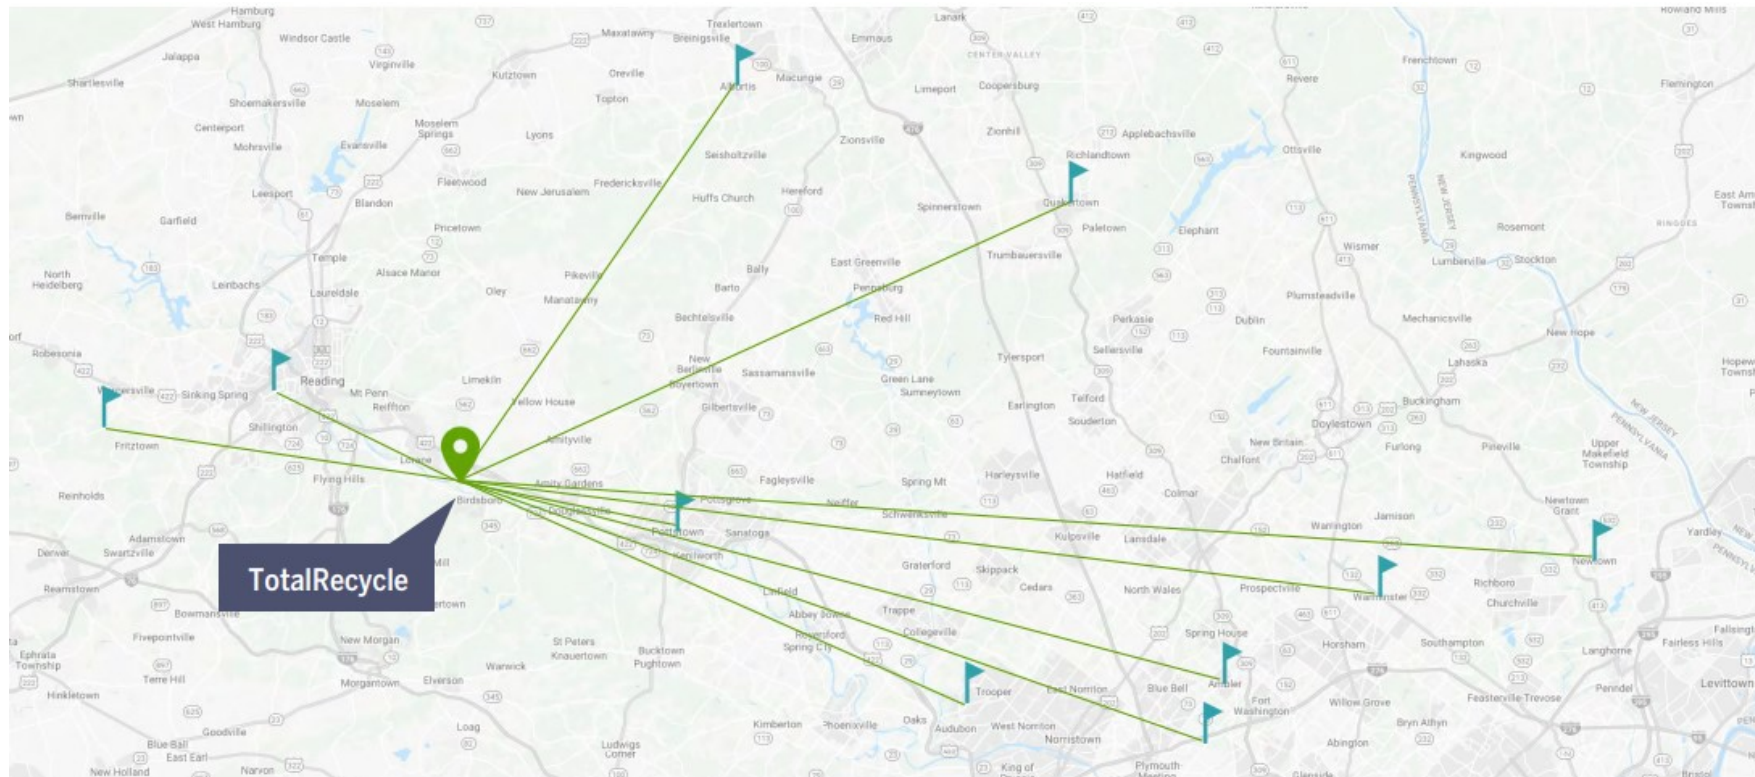

**TotalRecycle**

## 2. Decarbonizing a supply chain

Pilot program: 10 municipalities, 5 counties, 56,915 households

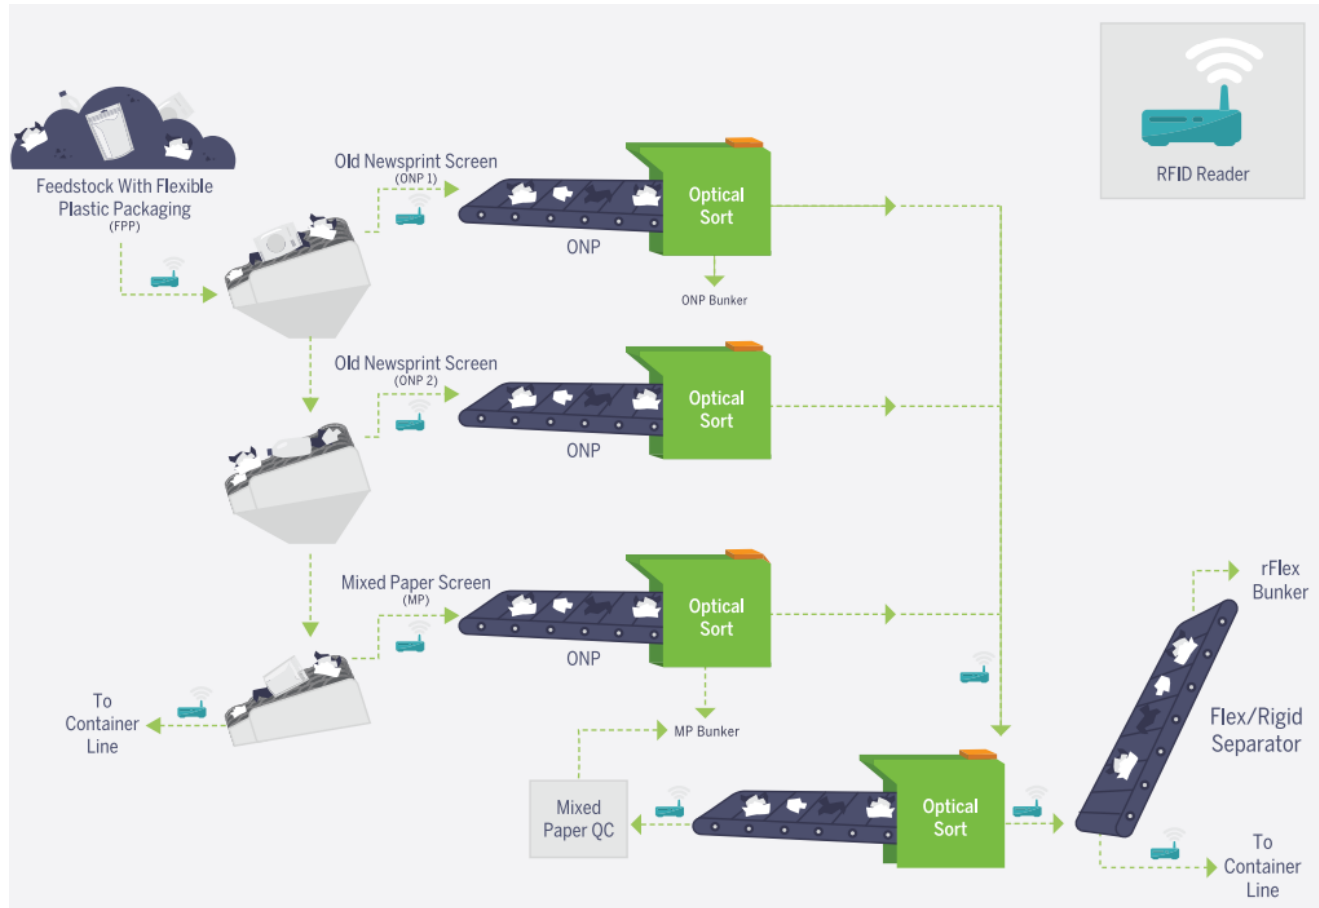

Source: MRFF, 2020

## 2. Decarbonizing a supply chain

### Pilot program

Source: MRFF, 2020

## 2. Decarbonizing a supply chain

### Initial test results

EVERBOARD® roof board containing 25% rFlex (Source: MRFF, 2020)

## 2. Decarbonizing a supply chain

### Initial test results

Paver made from rFlex (Source: MRFF, 2020)

Shredded & pelletized rFlex (Source: MRFF, 2020)

## 2. Decarbonizing a supply chain

### Research tools:

- Pilot testing
- Life cycle assessment
- Economic assessment

### Other tools:

- Stakeholder engagement
- Awareness raising, enhanced communication
- Market development

## 2. Decarbonizing a supply chain

### Initial LCA analysis results

- All market pathways show positive results
- Decontamination process plays an important role in total environmental performance

## 2. Decarbonizing a supply chain

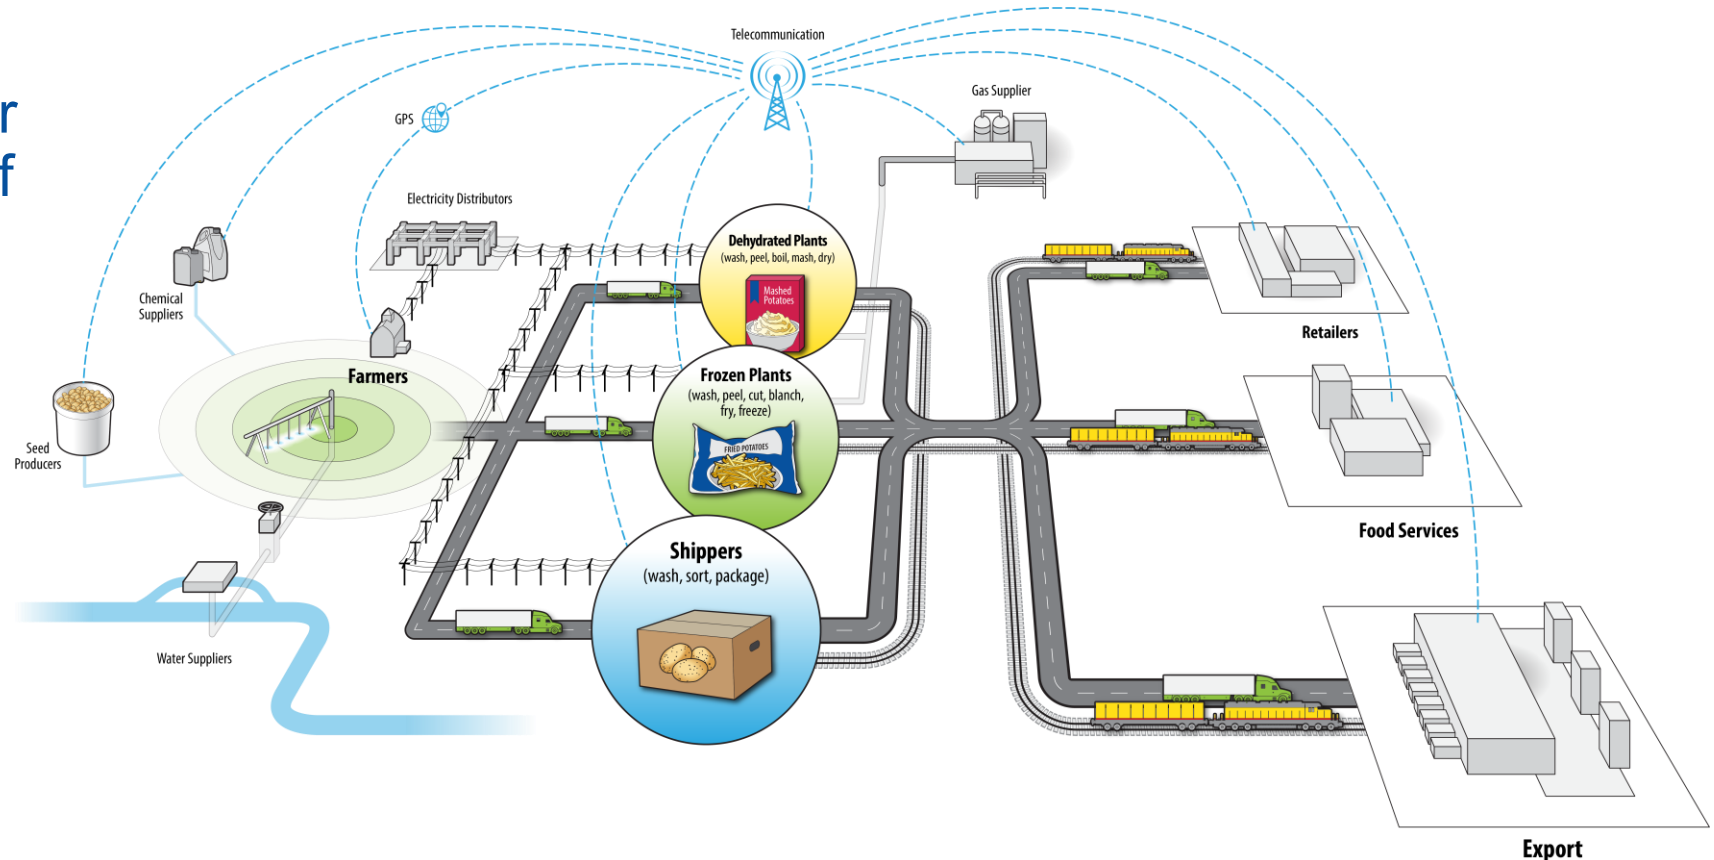

### Initial economic analysis results

- Roof coverboard is the most promising pathway
- Most pathways are more economical than comparable products
- Downstream market development is critical to drive rFlex demand and capacity expansion

### 3. Decarbonizing the potato supply chain?

- Internal INL research, partner with University of Idaho
- Initial goal to understand supply chain resilience

### 3. Decarbonizing the potato supply chain?

Year 1

- Map the supply chain
- Examine demand disruption impacts

Year 2

- Examine supply disruption impacts
- Conduct risk analysis

Year 3

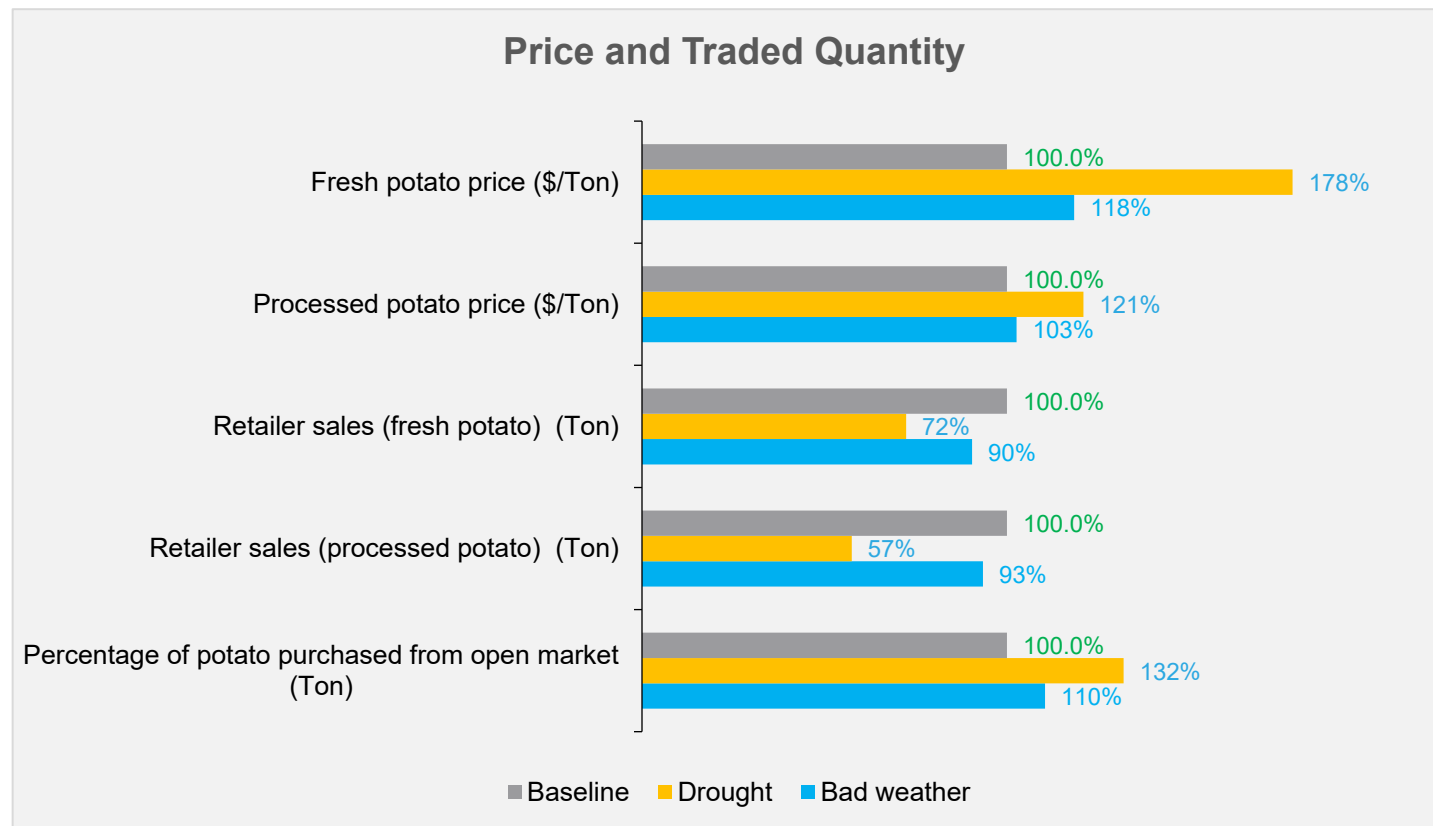

- Focus on manufacturing
- Connect infrastructure analysis & supply chain

### 3. Decarbonizing the potato supply chain?

Initial results for supply disruptions:

1) Early frost in Oct    2) Severe drought, 50% less water

### 3. Decarbonizing the potato supply chain?

Initial results for supply disruption: Early frost in Oct

### 3. Decarbonizing the potato supply chain?

- Potential approaches:
  - Optimize decarbonization at each stakeholder level
  - Optimize decarbonization at supply chain level

# THANK YOU!
